Assessment of the Higher Education System of Kazakhstan and Issues of Its Quality Management

Abstract. It is a summary of a research article and is used to help the reader to understand the essence of the article. The volume of the abstract must be at least 150 words and not more than 200 words in Russian, Kazakh and English languages. The structure of the abstract includes the following items:

- Introduction to the research topic.
- Aim, main directions and ideas of scientific research.
- Brief description of the scientific and practical significance of the work.
- Brief description of the research methodology.
- Main results and analysis, research findings.
- The value of the study (the contribution of this work to the relevant field).
- Practical implications of the outcome of the research.

Keywords: Keywords (5-7 words or phrases) should reflect the main content of the article; determine the subject area of the study; occur in the text of the article. Keywords are separated from each other by a comma.

DOI: <https://doi.org/10.32523/2789-4320-2024-1-x-x>

Received 9.04.2023. Revised 12.05.2023. Accepted 01.06. 2023. Available online 30.09.2023

In accordance with the headings potential authors of the journal should adhere to the following rules on **the structure of the IMRAD article: (introduction** (statement of the objectives, aim, history), **research methods, discussions/findings, conclusion**). The volume of the article (excluding the title, information about the authors, annotation, key words, bibliographic list) should be at least 6 pages (3,000 words) and not exceed 16 pages (7,000 words).

Introduction consists of the following main elements:

¹ * the corresponding author

- It is reported that there is a problematic situation (the absence of any research, the appearance of a new object, etc.) in justifying the choice of a topic based on the description of the experience of predecessors. Topicality of the topic is determined by the general interest in the study of this object, but the lack of comprehensive answers to existing questions, it is proved by the theoretical or practical significance of the topic.

- Definition of the object, subject, aim, objectives, methods, approaches, hypothesis and meaning of the work. The aim of the study is related to the proof of the thesis, that is, the presentation of the subject of research in the aspect chosen by the author.

- **The Literature review** section should cover fundamental and new works on the subject of study by foreign authors, analysis of these works in terms of their scientific contribution, as well as gaps in the study.

- IT is UNACCEPTABLE to have multiple references unrelated to the work, or inappropriate judgments about the author's own achievements, references to the author's previous works.

The methodology should consist of a description of the materials and progress of the work, as well as a complete description of the used methods.

- The characteristic or description of the research material includes its presentation in qualitative and quantitative terms. The characteristic of the material is one of the factors determining the reliability of the conclusion and research methods.

- This section describes how the problem was studied: detailed information without repeating previously published established procedures; identification of hardware (software) and description of materials are used, with mandatory novelty of materials and methods.

The scientific methodology should include:

- research question(s);
- the proposed hypothesis (thesis);
- stages of the study;
- research methods.

Findings/Discussion part is one of the most important sections of the article. The section provides an analysis and discussion of the results of the study. The conclusion based on the results obtained during the study are presented, the main essence is revealed. It is necessary to analyze the results of the work and discuss the relevant results in comparison with previous works, analyses and conclusion.

The tables are included directly in the text of the work. They should be numbered and accompanied by a reference to them in the text of the work. Figures and graphs should be presented in one of the standard formats: PS, PDF, TIFF, GIF, JPEG, BMP, PCX. Bitmaps must be executed with a resolution of 600 dpi. All details should be clearly conveyed in the figures.

For example:

Figure 2. Dynamics of admission, graduation and number of university students

Note: compiled based on the data [14]

Table 1

Number of international students by country of arrival [14]

Country of arrival	2017	2018	2019	2020	2021
Uzbekistan	3 683	9 500	25 964	15 642	14 404
India	3 500	3717	4450	4220	5 987
Turkmenistan	1 320	2 615	3 176	2 795	2 795
Russian Federation	1 075	1 273	1 247	1 298	1 263
Mongolia	439	565	888	1128	1010
China	1290	1240	807	871	811
Kyrgyzstan	1 026	1 026	1 026	1 067	659
Jordan	60	62	228	515	546
Other countries	1 505	1 671	1 683	1 533	1 462

Note: compiled based on the data [14]

Conclusion is generalization and summing up of the work at this stage; confirmation of the truth of the statement put forward by the author, and the author's conclusion about the change in scientific knowledge, taking into account the obtained results. Conclusion should not be abstract, it should be used to summarize the results of research in a particular scientific field, with a description of proposals or opportunities for further work.

Acknowledgement, conflict of interests

Specify the sources of funding and other contributions, acknowledgements, and conflicts of interest.

The contribution of the authors. In this section, it is necessary to indicate the contribution of each author to the work on the article. A contribution to a work is an intellectual investment, without which part of the work or the work as a whole could not be completed. The authors of the article may be persons whose contribution to the work is based on the following criteria:

- significant contribution to the concept or design of the work; collection, analysis or interpretation of the results of the work;
- writing a text and/or critically reviewing its content;
- approval of the final version of the article for publication;
- consent to be responsible for all aspects of the work, proper study and resolution of issues related to the reliability of data or the integrity of all parts of the article.

Persons who performed a different role in the preparation of the article can be indicated in the section of the article “Acknowledgements”.

The examples of formulations are not exhaustive, it is desirable to emphasize the uniqueness of the contribution of each of the authors, to detail his participation in the work on the article. It is necessary to indicate the name of the individual stages of the experimental work carried out for those co-authors whose contribution consisted in carrying out the experiment.

To create bibliographic references, use the tool - [Mendeley Reference Manager \(GOST\)](#)

Assessment of the Higher Education System of Kazakhstan and Issues of Its Quality Management

Abstract.

Keywords:

If there are works presented in Cyrillic in the list of references, it is necessary to submit the list of references in two versions: the first – in the original, the second – in the romanized alphabet (transliteration).

The romanized list of references should look like this: transliteration - <http://www.translit.ru>

For example:

[in Russian]

• *Then it is necessary to provide “information about the authors” in 3 languages.*

The part “information about the authors”, specifies all the data - the full name of the author for correspondence, academic degree, specialty, position, organization, address, zip code, city, country.

For example:

Information about the authors:

Iskendirova S.K. – corresponding author, PhD in economics, Professor of The Branch of the Academy of Public Administration under the President of the Republic of Kazakhstan of Akmola Region, 87 Abai str., 020000, Kokshetau, Kazakhstan

Zeinolla S.Zh. - PhD in economics, project manager, German-Kazakh University, Pushkin str., 111, 050000, Almaty, Kazakhstan
